Ashwin Sekhari

Contact Information

Address: Faridabad, Haryana, India
Website: https://ashsek.me
Phone: +91 98181 98151
E-mail: ashwinsekhari@gmail.com

Interests

I am interested in blockchains, network systems, consensus protocols, penetration testing, and sports programming. (GitHub/CodeChef)

Education

National Institute of Technology (NIT) Rourkela, India 2017-present
Bachelor of Technology in Computer Science and Engineering-CGPA 8.51/10

Delhi Public School (DPS), Faridabad, Haryana, India
AISSE (CBSE Board) [X Grade]-CGPA 10/10 2015
AISSCE (CBSE Board) [XII Grade]-Percentage 93.8% 2017

Research Experience

Stanford University, USA Summer 2020
Worked at Tse labs at Stanford University with Prof. David Tse.

University of Waterloo, Canada Summer 2019
Worked with Sirius blockchain research group with Prof. Srinivasan Keshav.

Indian Institute of Technology, Kanpur (IITK), India Summer 2018
Student research associate at Cyber Security Lab, worked with Prof. Sandeep Shukla.

National Hydroelectric Power Corporation Ltd., India Winter 2017
Gained exposure to their infrastructure, communication and SCADA system.

Other Experience

Indian Institute of Technology, Bombay (IITB) [SLIDES] [PAPER] Feb 19
Participated and presented a paper at the Third Workshop on Blockchain Technologies and its Applications which was attended by more than 100 participants.

Israel Institute for Advanced Studies, Jerusalem (IIAS) [POSTER] Dec 18
Participated and presented a poster at the 3rd advanced school in computer science and engineering: blockchains and cryptocurrencies which was attended by more than 150 participants.

IEEE Blockchain 2020 Sep 20
Meta reviewed a paper for Blockchain Technology and its Potential Applications (BTPA 2020) workshop organised under 3rd IEEE International Conference on Blockchain, Greece.

ITW-20 Nov 20
Currently reviewing a paper for 2020 IEEE Information Theory Workshop (ITW), Italy.

Publications

Entangled Blockchains in Land Registry Management 2019
with Rishav Chatterjee, Ras Dwidedi, Rohit Negi, Sandeep K. Shukla.

Polaris: A Scalable Geo-distributed BFT Consensus Protocol for Blockchains (working)
with L. Yang, Q. Duan, S. Lee, S. Rizvi, S. Keshav, B. Wong, P. Shenoy, W. Golab, S. Gorbunov.

Key Projects

A Secure Scalable Quantum-Safe Blockchain for Critical Infrastructure May-Jul 19
Supervisor: Prof. Srinivasan Keshav

- Implemented a byzantine fault-tolerant Global Membership Service (GMS) based on the paper RCanopus. It achieves byzantine fault tolerance by leveraging the features provided by Concord-BFT, a generic state machine replication library that can handle malicious (byzantine) replicas.
- Integrated the membership service with RCanopus using Remote Procedure Calls. More implementation as well as functional details about the GMS can be found at Github.
- Explored various aspects of consensus algorithms, formal verification methods, post quantum safety and energy systems through group meetings, talks and interactions with Professors.

Permissioned Blockchains in Land Registry Management May-Jul 18
Advisors: Ras Dwidedi, Rohit Negi; Supervisor: Prof. Sandeep K. Shukla (IITK) [Report]

- Developed and implemented models to efficiently translate the current land registration and maintenance system to blockchains. As a result, achieving significant security and transparency in transactions. This was based on "hyperledger-fabric", a blockchain framework.
- Developed an efficient document verification algorithm for verification of land registry documents which utilizes the concept of cryptography and merkle trees. Hence, enabling us to verify documents without its physical availability with the use of tokens.
- Explored various aspects of cyber security and computer science through research talks and interactions with PhD students, researchers, and Professors.

Course Projects

Energy Efficient Container Consolidation in Cloud data Centers 2020
Supervisor: Prof. B.D.Sahoo (undergraduate dissertation)
In order to reduce the impact of data centres on our environment, I am currently exploring container migration algorithms that focus on energy efficiency.

Analysis of Routing Protocols for Wireless Ad-hoc Sensor Networks 2020
Supervisor: Prof. Arun Kumar (Network Simulation Laboratory, NIT Rourkela)
Simulated and compared AODV, DSDV, and DSR routing protocols using NS-3 simulator and compared on essential metrics such as Routing overhead, Average delay, Duplication overhead, Packet delivery ratio, Throughput, and Data delivery cost.

Achievements

- Achieved team rank 270 out of 1200+ teams at Codechef Insomnia 2019
- Ranked 274 in Facebook Hackercup qualification round out of 10,000 participants 2018
- Secured 96 percentile in JEE ADVANCE and 99.6 percentile in JEE MAIN. 2017
- Admitted for undergraduate studies to the computer science department at University College London (UK), University of Edinburgh (UK), and University of Toronto (Canada). 2017
- Achieved AIR 29 in the TECHNOTHLON (conducted by IIT Guwahati). 2016
- Awarded FreeShip (100% scholarship) at Delhi Public School, Faridabad. 2016
- Received appreciation letter for excellence in CBSE examinations from Mrs. Smriti Zubin Irani (former education minister). 2015

Relevant Coursework

- Scaling Blockchains†
- Hyperledger Fabric (IBM)*
- Bitcoin and Cryptocurrency Technologies*
- Operating Systems
- Distributed Systems
- Machine Learning
- Compiler Design
- Cloud Computing
- Data Science
- Introduction to Computational Thinking and Data Science*
- Object Oriented System Design
- Data Communication
- Linear Algebra
- Discrete Mathematics
- Probability and Statistics
- Data Structure and Algorithms
- Computer Organization and Architecture
- Formal Languages and Automata Theory
- Design and Analysis of Algorithms
- Database Engineering

Skills

Programming Languages - Python (2-3), C++, Go, Solidity, JavaScript
Blockchains - Hyperledger Fabric, Truffle, Ganache, web3.js
Databases - MySQL, CouchDB, MongoDB
Other Tools - Git, LaTeX, Docker, gRPC
Communication - English (proficient), Hindi (proficient), Spanish (basic)

Professional Service

Student Mentor (2018-20) - NIT Rourkela - Tasked with ensuring a seamless transition from home to hostel life for ten freshmen students and addressing their academic, financial, mental and socio-cultural issues to the best of my abilities.

Google Developer Students Club (2019-20) - NIT Rourkela - Core Team Member and Blockchain lead of Google Developer Students Club (DSC).

SPAWN (2019) - NIT Rourkela - Technical head for the official competitive coding club of our college, and was tasked with introducing people to sports programming.

Social Service

2020: Delivered a speech on how to improve our immunity during COVID-19 and was awarded an appreciation letter by Central Industrial Security Force, India.

2018 - Participated in a public cleanliness drive and delivered a speech to spread awareness about sanitization among the general public.

2018 - Received an appreciation letter for motivating others during a plantation drive organized by National Hydro Power Corporation, India. Together we planted more than 2000 saplings in a landslide-prone area in India.

2017 - Guided a group of 100 students (along with 3 other group leaders) at NIT Rourkela in completing their activities under National Service Scheme (NSS), India.

† Scribed for the lectures which were taught by Prof. David Tse at Stanford
* Online course
